

What would it look like if AI was an act of care?

The full set. Seven cards, plus the one that sends people here.

NOBODY WILL SAY THIS FOR YOU

SEVEN SENTENCES THAT KEEP A HUMAN IN THE LEAD OF AI WORK

"What does good look like?"

"Show me one it got wrong."

"What did you assume?"

"A system cannot decide. Who did?"

"Not yet. Here is what is missing."

"Put me in the room where this gets decided."

"I will put my name on this. I checked it."

EVERY SENTENCE PROTECTS SOMEONE YOU WILL NEVER MEET.

MOVES ONLY YOU CAN MAKE

SIX THINGS NO AI MODEL WILL DO FOR YOU

NAME WHAT MATTERS. It optimizes. You choose.

NOTICE WHAT IS MISSING. Absence is never in the output.

SAY NO WITHOUT DATA. Some reasons are not in the file.

LET A PERSON CHANGE YOUR MIND. A model never will.

ANSWER FOR IT. No system can be held to account.

STAY WITH IT AFTER IT SHIPS. No model follows up.

THE CARING IS THE PART THAT CANNOT BE AUTOMATED.

PUT THE PATIENT IN IT

SIX MOVES THAT PUT CARE INTO AI-ASSISTED WORK

UNBLOCK THE SLOW STEP. A week saved is a week of a life.

PLAIN LANGUAGE FIRST. Rewrite until a 15 year old gets it.

WHO IS MISSING FROM THE DATA? Someone always is.

COUNT WHAT IT COSTS THEM. Every visit, every extra scale.

KEEP THE OUTLIER. An average is not a person.

NEVER PUT THEIR NAME IN IT. Not once, not to test.

MORE BIRTHDAYS. THAT IS THE WHOLE CASE FOR AI.

WRITE IT SO THEY CAN READ IT

SIX WAYS TO USE AI ON WHAT A PATIENT WILL READ

CUT THE LATIN. Say what happens to them.

ONE IDEA PER SENTENCE. Then read it aloud.

PUT THE RISK IN NUMBERS. Percentages, not "rare".

SAY WHAT THEY MUST DO. Apart from what we do.

TEST IT ON AN OUTSIDER. If they hesitate, rewrite.

KEEP THE HARD PART HARD. Never soften a real risk.

CONSENT THEY CANNOT READ IS NOT CONSENT.

YOU CANNOT DELEGATE THESE

FIVE AUTHORITIES OVER AI WORK THAT STAY YOURS

DEFINE IT. Before it starts, not after.

AUTHORIZE IT. Name the data it may touch.

CHALLENGE IT. Run the case you hope it fails.

STOP IT. You do not need approval to halt it.

IMPROVE IT. Fix the boundary, not the output.

DELEGATE THE WORK. THE PERSON IT REACHES IS STILL YOURS.

GET YOUR EVENINGS BACK

SIX TASKS TO HAND AI THAT BUY BACK THE MOST HOURS

THE DREADED TASK. Hand this one over first.

THE 40 PAGE PDF. Ask it questions. Do not read it.

THE WEEKLY ONE. Build it once. Reuse it forever.

THE BLANK PAGE. A bad draft in five minutes.

THE MESSY EMAIL. Say it out loud. Let it tidy.

THE PILE OF SMALL THINGS. All twelve at once.

YOU CANNOT STAY THE HUMAN IN THE LEAD ON EMPTY.

WHO IS NOT IN THIS ROOM

SIX QUESTIONS BEFORE YOU LET AI DECIDE

WHO CANNOT TRAVEL? Distance is an exclusion criterion.

WHO DOES NOT HAVE THE DEVICE? Digital is not neutral.

WHO WAS NEVER ASKED? Absence looks like consensus.

WHAT LANGUAGE DID WE SKIP? Translation is not enough.

WHO DROPPED OUT, AND WHY? The reason is the finding.

WHO WILL THIS NOT WORK FOR? Ask before you launch.

THE ONES WHO ARE MISSING ARE STILL DOWNSTREAM.

What would it look like if AI was an act of care?
